Jotun Announces Latest Addition to Fire Protection Range: Jotachar 1709 XT

Jotun has launched Jotachar 1709 XT, the latest innovation in its industry-leading Jotachar range of trusted intumescent fire protection coatings for the oil and gas industry. Engineered for fire performance in the most demanding environments, the product delivers competitive loadings and installation costs.

Electron E-ROBOT+3 3D: Reciprocator for Contour Detection Coating Systems

Electron E-ROBOT+3 3D, a vertical axis painting robot integrated with a high-tech contour detection system, performs precise vertical movements based on data from the E-SENSE+3 part detection system and operates seamlessly with E-ROBOT+3 AXIS independent gun systems.

Dürr Brings a New Generation of Low-Pressure Spray Guns: EcoGun ACE Pro Improves Industrial Paint Application

The completely redesigned EcoGun ACE pro is lighter, more ergonomic, and needs fewer parts. The new low-pressure spray gun design simplifies handling and increases operational reliability.

AkzoNobel Extends Chinese Marine Coatings Partnership to Accelerate Transition to Sustainable Shipping

A strategic agreement has been signed between AkzoNobel's Marine Coatings business and Winning Shipping in China which will help accelerate the maritime industry's transition to lower carbon operations.

X-Rite and Rhopoint Launch Rhopoint PANTORA Aesthetix[®] to Streamline Creation of Digital Material Twins

X-Rite Incorporated has announced a new collaboration with Rhopoint Instruments, a manufacturer of test equipment for appearance quality, to advance digital appearance innovation and support the growing use of digital twins in product development and marketing.

The Show Recorded Rising Attendance!

SFCHINA2025 successfully concluded on November 25 – 27, 2025 at the Shanghai New International Expo Centre (SNIEC), Shanghai, P.R. China. This year's visitor and exhibitor figures delivered notable results, underscoring the exhibition's position as a leading platform for cooperation, knowledge exchange and business opportunities.

Solving Problems outside the Square

There have been many millions of dollars spent on trying to make working with toxic chemicals like cyanide, hexavalent chromium, lead, cadmium, MEK, acetone, MIBK etc. safe or less hazardous or designing systems to treat and/or destroy the emanating wastes from their application processes.
